Press Release

Maerospace Welcomes Dr. A. M. (Tony) Ponsford to Advisory Board

Waterloo, ON, October 24, 2017: Maerospace Corporation, a leading international provider of AIS-based ship tracking and predictive analytics, has expanded its Board of Advisors to include Dr. Tony Ponsford, a globally-recognized expert in maritime tracking and data fusion. According to Eric Meger, CEO of Maerospace, "We are very excited to welcome Tony to the team. His insight and expertise in the rapidly growing field of multi-sensor fusion will be invaluable in progressing our goal to improve maritime situation awareness globally."

Dr. Tony Ponsford was formerly the Principal Engineering Fellow and Technical Director at Raytheon Canada Ltd. where he was instrumental in developing and deploying long-range surveillance radar systems. He is also an IEEE Distinguished Lecturer on Maritime Domain Awareness and a key leader in the Canadian Tracking and Fusion Group, an industry expert's association advancing the state of the art in the field.

Dr. Ponsford has published multiple technology and maritime-related papers and is a regular contributor to national and international forums on maritime domain awareness.

About Maerospace Corporation

Maerospace Corporation, produces TimeCaster™, enhancing AIS and LRIT to provide the world's most accurate and real-time picture of the maritime domain. TimeCaster™ enhances the location accuracy for all ships around the globe by more than ten times that of raw satellite/coastal AIS data. In addition, the company's ADVISOR™ product monitors ship behavior in real-time and compares it with predicted behavior to detect anomalies. TimeCaster ™ and ADVISOR™ are available directly from Maerospace for large projects and for small fleet tracking via their distribution partner CLOUDEO (cloudeo.com). Maerospace Corporation is the supplier of ship tracking data to the Government of Canada, including the Department of National Defense, Coast Guard, DRDC, RCMP and the Canadian Space Agency.
